Introduction

The ARAKU Inspired Coffee Website is a front-end web development project created as part of the User Interface Design (UID) course. The website is inspired by the visual design, layout structure, and user experience of the ARAKU Coffee website. The objective of this project is to design a modern, attractive, and responsive coffee brand website using web technologies.

The website showcases various sections such as a hero banner with video background, featured coffee products, store locations, training campus information, company story, Arakunomics section, and a professional footer. The project focuses on creating a clean user interface, smooth navigation, and an engaging user experience.

Objectives

The main objectives of the project are:

- To understand the fundamentals of front-end web development.
- To design a visually appealing website inspired by a real-world brand.
- To create responsive layouts that adapt to different screen sizes.
- To implement modern UI design principles.
- To improve user experience through proper content organization and navigation.
- To gain practical experience with HTML, CSS, JavaScript, and GitHub.

Technology Stack

Layer	Technology	Purpose
Front-End	HTML5	Structure and content of the website
Styling	CSS3	Design, layout, responsiveness, animations, and visual appearance
Scripting	Java Script	Interactive features and dynamic behavior
Code Editor	Visual Studio Code	Development and editing of source code
Version Control	GitHub	Source code management and project hosting
Media Assets	Images & Videos	Visual content for the website
Browser	Google Chrome / Microsoft Edge	Testing and execution of the website

Project Structure

File / Folder Description

index.html	Main webpage containing the complete website structure
style.css	Contains all styling, layouts, colors, fonts, and animations
script.js	Contains JavaScript code for interactive functionality
images/	Stores all images used in the project
video/	Stores the hero background video

Website Features

1 Hero Section

The homepage contains a full-width hero section with a background video. This section creates a premium visual experience and immediately captures user attention.

2 Navigation Bar

A responsive navigation bar was developed with menu options such as Shop, Learn, About, and Experience. The navbar provides easy access to different sections of the website.

3 Featured Coffees Section

This section highlights premium coffee products using visually appealing cards containing images, descriptions, and call-to-action buttons.

4 Find ARAKU Section

The Find ARAKU section helps users discover nearby coffee locations and provides information about the brand's coffee spaces.

5 Training Campus Section

This section presents information regarding coffee education and training programs inspired by the Specialty Coffee Association standards.

6 Our Story Section

The Our Story section explains the inspiration behind the coffee brand and highlights sustainable farming practices and community involvement.

7 Arakunomics Section

The Arakunomics section explains how the coffee ecosystem benefits farmers, consumers, and the environment. Interactive cards were implemented to improve user engagement.

8 Footer

A professional footer was created containing:

- Quick Links
- Shop Categories
- Learn Section
- About Section
- Contact Information
- Social Media Links

Challenges Faced

During the development process, several challenges were encountered:

- Creating a responsive navigation bar.
- Matching the layout and spacing of the reference website.
- Integrating video backgrounds.
- Designing interactive flip cards.
- Managing image proportions and alignment.
- Implementing a professional footer structure.
- Maintaining consistency across different sections.

These challenges were solved through testing, debugging, and iterative design improvements.

Results and Outcome

The final website successfully recreates the premium and elegant appearance of a modern coffee brand website. The project demonstrates effective use of HTML, CSS, and JavaScript to create an engaging and user-friendly interface.

The website includes multiple content sections, interactive elements, responsive layouts, and modern design components that enhance the overall user experience.

Conclusion

This project provided valuable hands-on experience in front-end web development and user interface design. Through the implementation of HTML, CSS, JavaScript, and GitHub, a complete coffee brand website was successfully developed.

The project improved practical skills in responsive design, web page structuring, styling, debugging, and project deployment. It also enhanced understanding of modern UI/UX principles and real-world website development practices.
